### Technical Skills

**Strong:** Javascript, ECMAScript 6, JQuery, Bootstrap, HTML, CSS, ReactJS, Redux, Node.JS, MongoDB

**Experienced:** Web APIs/JSON, OOP and MVC paradigms, Linux, PHP, MySQL

**Tools:** Chrome Dev Tools, Postman, Git, Github, PHPStorm, Amazon Web Services

### Application Developed

#### BatsuApp

- An accountability App developed with a team of 5 developers.
- The project used front-end framework of **ReactJS** and **Redux** for basic styling and functionalities and **Bootstrap 4** for extra styling. Also used back-end framework of **PHP** to retrieve data from front-end to store data into **MySQL** database.
- Utilized **Google's geolocation API** to track the user's locations from the current location.

#### Reversi Game

- A reversi/othello game created with a team of three developers.
- Used **HTML5** to create a basic outline of the game boards, **CSS3** to apply styling and effects, and with a combination of **Javascript** and **Jquery** to build auxiliary functions as **Front-end Developer** and **UI/UX Designer**.

#### Drink Drunk Drank

- An application of 3 different **API** calling with a team of 4.
- Utilizing Google Place's and Map's **API** to retrieve the map data and the data's coordinates to apply onto the app.

#### Memory Match Game

- A Fast&Furious themed memory matching game that tracks accuracy, number of attempts, and number of games played.
- Utilized **HTML5** to create a basic skeleton of the website, **CSS3** to apply styling and animations, and a combination of **Javascript** and **Jquery** to give the game functionality.

#### Calculator

- An independently developed application that does calculation.
- Utilized **HTML5** to create basic skeleton of the website, **CSS3** for styling and animation.

### Professional Experience

#### Personal Trainer - Wilfit Sports Club

2015 - 2016
